Monday Aug. 31st 1936

Dear Q-C:

A report was made tody that last Monday a man at the Sun Rubber plant was given the alternative of paying for an accidentaly broken mold or being fired. In the end he was fired, and Dalrymple, representing the unchartered members of the rubber workers entered the picture, He booked a conference with the Sun Management, the outcome of which is not yet known , But failure of the man to return to work is threatened by a picket line of combined Rubber workers which will close the plant.

It was reported that 25 Sun rubber employees are now paid in to the new organization and as many more are partly paid. No Girls have yet been taken in.

It was rumored that the Pitts Valve Local would hold a meeting tonight and the Committee would try to sell the Local what they honestly believe is the final offer of the Management. At 11:30 PM tonight, all pickets were gone and the Picket Headquarters was locked up and deserted and the report was out that they were going back to work.

Respectfuly

M-10
